Dometic Design Line miniBars

Great design to match your style

Illuminated product presentation, elegantly curved fronts, or beautiful wood finish – Dometic Design Line miniBars please the discerning eye and set your hotel apart from others. Moreover, they give you all the flexibility you need. Fitted on rollers, they can be easily moved to wherever required. Naturally, they can also be integrated into a piece of furniture, or supplied in a colour to match your furnishing concept. Entirely noiseless absorption cooling meets your guests' need for peace and quiet. State-of-the-art technological features such as sensor-controlled cooling units and Fuzzy Logic Energy Control place the Dometic Design Line in a class of its own – a class that satisfies exclusive demands.

- Noiseless absorption cooling technology
- Built-in or free-standing use
- Rollers for perfect mobility
- Fuzzy Logic Energy Control for lower energy consumption
- Sensor-based cooling unit control (CUC system)
- Automatic defrost
- Door decor panels in many colours (project orders)
- Certified according to ISO 9001 and ISO 14001
- In compliance with European Energy Efficiency Regulation 643/2009

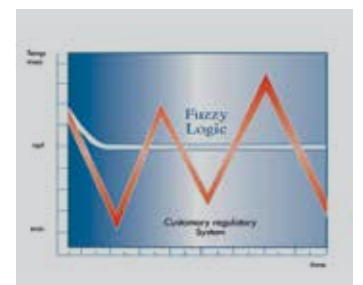

The LED door opening control system shows whether the miniBar has been opened. You'll see at first glance if it's necessary to check and refill.

Reliable performance: sensor-based cooling unit control (CUC system)

An enticing offer: illuminated unrefrigerated compartment (RH 456) promotes miniBar sales

Fuzzy Logic Energy Control: for optimised temperature management and low operating costs
